## NEW FEATURES

www.topsolid.com

› IMPROVEMENT AND INTEGRATION OF NEW LAMELLO HARDWARE

• New Tenso P-10 pair Component.

• Visual check of the position of the aggregate right from the design phase.

• New "Clamex P" machining process in 5X machining.

• This continuous 5X cycle can even be used on a WoodCam2D workstation!

› ASSISTED MATERIAL SEARCH AND CATALOG CODE CREATION WIZARDS

• The search tool simplifies navigation for material, coating and finish

• Thanks to this new catalog code editor, this notion will be crystal clear to you.

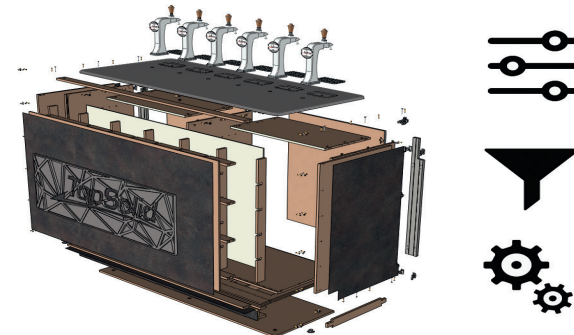

› IMPROVED MACHINING OF THE NESTING PROCESS

• Customization of nesting names.

• Nesting reversal management with integrated calibration.

• Suggestion of the tools required for production.

• Choice of the positioning stops in multi-machining.

› GREATER AUTOMATION OF THE TOPOLOGICAL MACHINING OF IMPORTED PARTS

• Facilitated machining of external 3D shapes through integration of the topological analysis in the list of operations.

› MORE PROJECT MANAGEMENT FUNCTIONS

• Assembly definition, conditional codifications, predefined edges, filters, automatic processes.

A multitude of new functions are now available to improve the management of your projects.
